

## How to make a knights shield

Would you like to make a knights shield? If so, follow these instructions and you too will be able to make a wonderful shield just like me!

### What you need:

- thick cardboard
- scissors
- masking tape
- glue
- a ruler
- colouring pencils, felts or paint.

### What you do

First draw the outline of your shield on a piece of thick card.

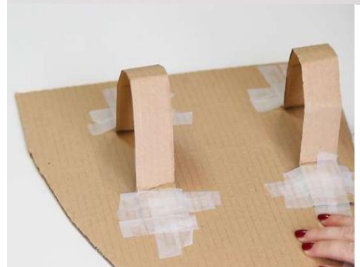

Next cut along the outline.

Then decorate your shield.

After that make 2 arm straps and tape them to the back of the shield.

### Final Note

Remember to take your time making your shield and be as creative as you want. Always ask an adult for help if you find anything tricky!

## Parent instructions for arm straps

1. Cut a strip of cardboard about 20cm x 7cm.
2. Tape one end to the back of the shield.
3. Bend the card so it makes a loop which you can put your arm through and then tape the other end down.
4. Repeat this so you have two arm straps which you can use to keep hold of your shield.
