

Make paper plate birds

These are simple but very effective. Use your creativity to make the beaks, wings and tails in any way you like.

You will need:

- Paper plates
- Red, yellow and black paints
- Paintbrushes
- Googly eyes
- Glue
- Black pipe cleaners
- Piece of card
- Yellow paper

1 Fold the plate in half, then unfold again.

2 Paint the base colour – we've used black for the blackbird, and orange (mixing red and yellow) for our robin.

3 Give the robin a red breast. Otherwise it's not a robin!

4 Fold the birds again so they are able to stand. Add the eyes, beak, wings and tail – use your imagination. We have frilled the paper for our robin's wings and the blackbird's are made of pipe cleaners.

5 Stand your birds up and admire.
