Steps to success;

1. Read the word problem.
2. Writ the multiplication number sentence.
3. Draw a jotting.
4. Write the repeated addition number sentence.
5. Count accurately.

In a classroom there were 5 tables. Each table had 4 children sitting around it. How many children were there altogether?

For a sports lesson the teacher collected 6 bags of balls. There were 5 balls in each bag. How many balls were there altogether?

There were 5 boxes of chocolates hidden in the cupboard. Each box had 5 chocolates in. How many chocolates were there altogether?
