

Year 2 – Monday Maths

Today's maths challenge is to spot the difference between addition & subtraction problems and solve them mentally. Remember to use your counting forwards & counting backwards strategies to help you.

If you find this a little tricky you may want to use a numberline or 100 square to help you. Try not to use any jottings...we are practising calculating mentally using our head!

It is important to practise solving simple number sentences mentally as you will need this speedy maths for the rest of the week's maths learning.

Steps to success;

1. Read the number sentence.
2. Circle the operation (is it + or -).
3. Sort it into the correct column.
4. Decide if you need to count forwards or backwards.
5. Count accurately.
6. Write your answer.

$29 + 8 =$	$25 + 9 =$	$38 + 9 =$
$43 + 8 =$	$46 + 6 =$	$57 + 9 =$
$60 - 10 =$	$40 + 20 =$	$30 + 10 =$
$25 - 3 =$	$38 - 5 =$	$39 - 3 =$
$50 + 40 =$	$70 - 20 =$	$60 - 40 =$
$49 - 7 =$	$58 - 6 =$	$69 - 8 =$
$50 - 10 =$	$30 - 10 =$	$70 + 10 =$
$64 - 0 =$	$21 + 4 =$	$36 + 0 =$

+	-
